

~~SECRET~~

INTERNAL DUPLICATION - RESEARCH AND DEVELOPMENT
(see same subject under "External Duplication");

COMPONENTS CONCERNED: DD/I - OSI; DD/S - OC; DD/P - TSS, Materiel Board and FI;
SA/DCI and Elint.

REFERENCE: DD/I papers, pg. 3, para. 2.(3).

"There has been some indication, especially from consultants, of overlap in the scientific and technical intelligence activities of the various components of the Agency. An examination of the functions assigned to SI, TSS, Materiel Board, Commo, SA/DCI and perhaps others, may indicate areas where possible savings in personnel can be effected through closer coordination or centralization of efforts. The present diverse responsibilities for ELINT could well be included in such an examination."
